Subject: Eucalyptus removal issue

Dear BCPUD Board,

I understand the concern about fire with the trees.

However the eucalyptus are a source of

1. enhancing the air for us to breathe!
2. a wonderful wind break for the whole area!
3. a source of habitat for the butterflies!

I also enjoy their beauty and their scent which is good for our lungs and effects our breathing!

I am for thinning and management but do not support mass removal!

I do not support the plan to remove 65 - 100 trees for use of salmon habitat restoration!

Thank you.

Eleanor Lyman
