

Jeff Clapp met with staff on 1/30/2025.
We discussed history of the BCLT's meters.

History of BCLT meter LWUPs “water use stacks” as delineated in Special Meeting Oct, 4 2023:

Temporary request to reallocate:

- 12,250 ft³/q from 31 Wharf to 130 Mesa (BoLinda Vista)
- 3000ft³/q from 6 Wharf to 130 Mesa
- 130 Mesa (had its own meter); had 2700ft³/q prior to the reallocations from 31 and 6 Wharf

So Total at 130 Mesa after these reallocations were approved by Board was 17950 ft³/q

Staff Confirms Current State of BCLT's meter LWUPs:

- 130 Mesa (BoLinda) = 17950 ft³/q
- 31 Wharf (Habitat)= 0 ft³/q
- 20 Wharf (Gibson) = 4200 ft³/q
- 6 Wharf (Garage) = 6000 ft³/q
- BCLT does not yet own 160 Mesa; Meter does not currently have an LWUP but if BCLT purchases it will have an LWUP of 16733 ft³/q

Jeff is now Requesting

Request to transfer/allocate:

- 6000 ft³/q from 130 Mesa to 31 Wharf.
- Total remaining at 130 Mesa after this transfer: 11 950 ft³/q

Jeff will come before the board on March 19. Regular to make this formal request.

Staff also brought to Jeff's attention that the total allocation to 31 Wharf cannot go above 12, 250 ft³/q due limits on wastewater production at sewer connection (per previous agreement between Jennifer Blackman and Arrienne Darr).
