BCPU Board of Directors

I am requesting a permit for road repair on Birch and Cedar roads between my property and Alder Rd. Also, drainage repair between my property, 370 cedar and Larch drainage swale on the Northeast side of the road and in the right of way.

HISTORY:

For the past 54 years I have organized with neighbors and personally worked on most of the drainage and road rock on Cedar and shared work on Birch between Alder and Larch.

When I built my house in 1971 the dirt roads between Overlook and my house looked to have never seen much road rock and was unpassable the following winter.

APPLICATION:

My application to fill potholes on Birch and Cedar roads on the right of way to my house with approved material does not seem to be exceptional and should not be restricted by neighbors who do not want holes filled because some people will drive faster or who don't like the color of the material or other personal reasons.

Application 1:

Doesn't include any drainage work and should be considered sub-base as the current level of some of the Birch and Cedar road is below grade on either side of the road.

Application 2:

Would be to maintain an existing drainage ditch between my house on Cedar and the Larch swale.

SUMMARY:

I believe permits for maintenance and repair should be available over the counter at BCPUD office and not subject to BCPUD Board review.

Thank you for your consideration,
Rodney Krieger
