

Bolinas-Stinson Resource Recovery Project Update

Site Hours:

The RRP site is back to normal operations. The hours of operation are 9:00am to 4:30pm, Monday, Wednesday, Thursday, Friday, and Saturday

Thank you to the community for your patience while we manage the material that was on-site.

Grinder Issues:

- Thanks to George Krakauer, who convinced CalTrans to issue a permit for the large tub grinder to come through the wye project, we were finally able to get the large amount of material at the RRP site ground. Thank you George!!
- Currently our staff, with help from Don Murch, is actively turning the ground material to facilitate composting.
- The composted material will be available for free for community members who would like to pick some up. All additional compost will be utilized by our local farmers.

Free Chipping Day: the Marin Wildfire Prevention Authority will be hosting their annual green waste drop off day on October 7th. The MWPA provides free chipping of green waste material at the Resource Recovery site for fire prevention purposes. All community members are encouraged to bring their green waste to the site to be chipped for free on the 7th. Notices will go out on NextDoor and in the Hearsay.
